

4SIGHT ASSET AUTOMATION RECOGNISED AS TOP IMPLEMENTATION PARTNER

4Sight receives Implementation Award at X-Change User Conference

4Sight's Asset Automation division was recently recognised as one of the top three Implementation Partners at IS3's X-Change User 2022 Conference, where they focused on project excellence in Aveva solutions.

In the planning and operations award category, qualifying criteria were solutions implemented that have delivered a quantifiable business benefit.

4Sight's implementation of the Aveva solution at Reckitt, Pharmaceutical company, earned both parties the winning spot here.

Danie Badenhorst, Managing Director of the Asset Automation Division of 4Sight said, "We are highly appreciative of the recognition bestowed on us and the Award received. This validates the skills, commitment and experience of our team and we are truly proud of them."

Willem Du Preez, Engineering Manager and Danie Badenhorst, Managing Director of 4Sight Asset Automation

IS3 technology lead, Sameer Allopi commented, "The customer awards recognise project excellence in the categories of Engineering, Asset Performance and Monitoring and Control. These projects significantly demonstrate our customers' power of purpose, in shaping their sustainable future."
