4Sight Asset Automation team certified by Schneider Electric as a preferred Certified Alliance Partner in MMM

4Sight's Asset Automation team has been certified by Schneider Electric as a preferred Certified Alliance System Integrator Partner in Mining, Minerals and Metals (MMM) in Southern Africa.

Schneider Electric congratulated 4Sight for achieving this important status.

This recognition was bestowed on 4Sight Asset Automation for demonstrating exemplary experience - long-term dealings in the MMM market coupled with a strong reputation; Successful implementations of the Schneider Electric solutions in the MMM segment showcased through 3 project references validated by the respective customers; Clear focus of business and strategy in the segment and lastly, completion of the Schneider Electric Mining Metals Minerals EcoStruxure value proposition training, where the individuals had to master the Schneider Electric system offer and technology.

Danie Badenhorst, Divisional Executive of 4Sight Asset Automation says, "We are proud to be the first Schneider Electric partner in South Africa, to receive this prestigious certification. He adds, "It will elevate our visibility in terms of 4Sight's capabilities in the industry and allow us priority access to opportunities, support and joint business planning with Schneider Electric."

Tertius Zitzke, Chief Executive Officer of 4Sight comments, "With Mining Minerals and Metals being a key segment for our Operational Technologies Cluster and 4Sight Asset Automation, we are confident that they will remain focused on growing our business in the industry."

Badenhorst concludes, "We value Schneider Electric as a Strategic Partner to provide automation solutions to build sustainable mining, minerals and metals operations, throughout the African continent. We are committed to maintaining our Certified Alliance Partner status, through continuous investment in our people and expanding our delivery capability."
